

[CerberusCrackedApk](#)

There are two ways to control Cerberus remotely, if your device is lost or stolen:

1. If your device is connected to the internet, you can log into [www.cerberusapp.com](http://www.cerberusapp.com) from a computer or another device and send commands from the web dashboard
2. Otherwise, you can send SMS commands from another phone. A list of all available SMS commands has been sent to your email address

You can also install the app "Client Cerberus", that lets you easily send both web and SMS commands.
